

I am so tired of getting unwanted phone calls trying to sell me something. I am the one PAYING my phone bill and it is MY phone number. I have MY phone/phones for my use, not for the means for some company to do telemarketing using my phone. I want this to stop!!!!!! I have signed up on the Do NOT Call List and it has not helped much. I pay for my phone and have my phone for MY use. It is NOT for anyone else to use to bother me and try to make a living. What would be done if a company wanted to tap in to my cable line or gas line or electric line to conduct their business using MY services that I am paying for? I see this in the same way. I am paying for this service for MY use. This is not a service I am providing for telemarketers to use.

I am also upset that telemarketers have now started using recorded messages, so now I can not speak to the caller and tell them to remove my phone number from their calling list. This is even worse!!!!!!!!!!!!!!

It must all be stopped. I want MY privacy BACK. I want MY paid service back in my control. They are stealing from my paid service. On cell phone service, I pay for my service for the minutes and when they call they are stealing even worse then. They are bothering me and using my paid services to try and make money. Where are my share of their profits from their buisness transactions? They used up my minutes on an unwanted call so when am I going to get paid from their overall profits?
